Summary

Computer Engineering student (expected 2027) with seven cloud certifications, including AWS Certified Solutions Architect – Professional and Google Cloud Professional Cloud Architect. Hands-on experience with Terraform, Docker, Kubernetes, Helm, Argo CD, and GitHub Actions. Seeking a Cloud Engineer or DevOps Engineer internship or junior role.

Certifications

- **Google Cloud Certified – Professional Cloud Architect** Sep 2026
- **AWS Certified Solutions Architect – Professional** Aug 2026
- **AWS Certified CloudOps Engineer – Associate** Apr 2026
- **AWS Certified AI Practitioner** Apr 2026
- **AWS Certified Solutions Architect – Associate (SAA)** Dec 2025
- **AWS Certified Cloud Practitioner** Oct 2025
- **Huawei HCCDA – Tech Essentials** Sep 2025

Technical Skills

- **Cloud Platforms:** Amazon Web Services (AWS), Google Cloud Platform (GCP)
- **Cloud Architecture:** Well-Architected Framework, High Availability & Fault Tolerance, Disaster Recovery (Backup & Restore, Pilot Light, Warm Standby, Multi-Site), Multi-Region & Multi-AZ Design, Microservices, Event-Driven & Serverless Architecture, Cost Optimization
- **Cloud Migration & Hybrid:** Migration Strategies (6 Rs), Application Migration Service, DMS, SCT, Snow Family, DataSync, Site-to-Site VPN, Direct Connect, Storage Gateway
- **Cloud Networking:** VPC Design (Subnets, Route Tables, NAT, Internet Gateway), VPC Peering, Transit Gateway, PrivateLink & VPC Endpoints, Route 53, CloudFront, ALB/NLB, Security Groups & NACLs, WAF & Shield
- **Cloud Security & Governance:** IAM (Roles, Policies, Federation/SSO), AWS Organizations, Control Tower, SCPs, Multi-Account Strategy, KMS, CloudTrail, AWS Config
- **AWS Services:** EC2, Auto Scaling, S3, EBS, EFS, RDS, Aurora, DynamoDB, Lambda, API Gateway, SQS, SNS, EventBridge, Step Functions, ECS, EKS, CloudFormation, CloudWatch
- **Containers & Orchestration:** Docker, Docker Compose, Docker Swarm, Kubernetes (CKA-level knowledge), Helm
- **CI/CD & GitOps:** GitHub Actions, Jenkins, Argo CD, Git, GitHub
- **Infrastructure as Code & Configuration:** Terraform, Ansible, AWS CloudFormation
- **Monitoring & Observability:** Prometheus, Grafana, AWS CloudWatch
- **Linux & Web Servers:** Red Hat Linux administration (RHCSA/RHCE-level coursework), systemd, firewalld, users/groups & permissions, Bash scripting, HTTP/HTTPS, Nginx
- **Networking & Infrastructure:** TCP/IP, Routing & Switching, VLANs, Subnetting (CCNA-level), RAID, File/Block/Object Storage, NAS/SAN, KVM, VMware (basics), Huawei virtualization (CNA)
- **Backend & Databases:** Microservices, Node.js, RESTful APIs, C#/.NET, ASP.NET MVC, Entity Framework, SQL Server, Database Design
- **Programming:** Python, Bash, C#, JavaScript, Java, C++
- **AI & Machine Learning:** Machine Learning fundamentals (supervised & unsupervised learning, neural networks) from university coursework and Andrew Ng's Machine Learning course

Projects

- **SkillGap – Job-Market Skill-Gap Advisor** [GitHub]
  Final project of a college bootcamp led by our graduation project supervisor to develop our skills
  Technologies: Node.js, Express, PostgreSQL, Redis, Docker, Helm, Argo CD, GitHub Actions
  - Handled the DevOps work for a team project: containerized the Node.js/Express backend with a multi-stage Docker build.
  - Packaged the application as a Helm chart and implemented GitOps continuous delivery with Argo CD.
  - Built CI/CD workflows with GitHub Actions to automate build, test, and deployment.
- **Real-Time Auction System on AWS EKS** [GitHub]
  Mid-bootcamp project of a college bootcamp led by our graduation project supervisor to develop our skills
  Technologies: AWS EKS, Kubernetes, Docker, CI/CD
  - Handled the DevOps and deployment work for a team project: containerized the real-time bidding application with Docker and deployed it to an Amazon EKS cluster.
  - Designed automated CI/CD pipelines to build, test, and deploy the application on every code change.
  - Configured the cluster for high availability and scalable handling of concurrent auctions.
- **Scalable and Highly Available Environment on AWS + Terraform** [GitHub]
  Hands-on practice project applying a tool/course after learning it
  Technologies: AWS, Terraform, EC2 Auto Scaling, ALB, RDS, CloudWatch
  - Designed a multi-AZ architecture with EC2 Auto Scaling, Application Load Balancers, and RDS, provisioned with Terraform.
  - Ensured fault tolerance and high availability, with monitoring through CloudWatch.
- **Serverless Cafe Orders Platform on AWS + Terraform** [GitHub]
  Hands-on practice project applying a tool/course after learning it
  Technologies: AWS Lambda, API Gateway, DynamoDB, S3, Terraform
  - Built a serverless backend with AWS Lambda, API Gateway, and DynamoDB, with the entire infrastructure provisioned as code using Terraform.
  - Hosted the frontend on Amazon S3, delivering a scalable and cost-efficient architecture.
- **Three-Tier Docker Application** [GitHub]
  Hands-on practice project applying a tool/course after learning it
  Technologies: Docker, Docker Compose
  - Built a multi-container application with Web, App, and Database tiers.
  - Implemented custom container networking, persistent volumes, and orchestration with Docker Compose.

Training

- **Web Development using .NET** – ITI — Aug 2026 – Sep 2026
- **Linux Administration** – NTI, Digital Egypt Youth Program — Oct 2025 – Nov 2025
- **Cloud Computing Track** – NTI & Huawei Egyptian Talent Academy — Aug 2025 – Sep 2025
- **Infrastructure, Systems, Applications and Cybersecurity Fundamentals** – MCIT — Jul 2025 – Aug 2025
- **Cloud Architect Summer Training** – NTI & ITIDA — Jun 2025 – Jul 2025

Education

Bachelor of Engineering in Computer Engineering — *Expected Graduation: 2027*
Shoubra Faculty of Engineering, Benha University
Relevant Coursework: Operating Systems, Computer Networks, Computer Organization & Architecture, Databases, Artificial Intelligence & Machine Learning
